

## Sustainability Mission Statement of Valserhof

### Our Vision – Where do we want to go?

Valserhof pursues a holistic approach to sustainability, combining ecological, social, and economic aspects. We focus on regional partnerships, resource-efficient operations, eco-friendly mobility, and the preservation of culture and tradition. By using natural materials, renewable energy, and local products, we minimize our environmental footprint and create a forward-looking, responsible environment for guests and staff.

### Strategic Fields of Action

**Staff** Our employees are the heart of our hotel. Mutual respect and the promotion of a healthy work-life balance are key components of our corporate culture. We provide a pleasant work environment where staff feel valued and can thrive.

**Regionality and Sustainable Purchasing** We emphasize local partnerships and prefer regional products. We source food and goods from local farmers and suppliers whenever possible, strengthening the local economy and reducing transport distances. We support farmers in marketing their products and foster long-term cooperation. For construction and maintenance, we work with local craftsmen. We also use eco-friendly products like sustainable cleaning agents and office supplies.

**Resource Saving and Waste Reduction** We handle resources consciously. Numerous measures have been implemented to reduce energy and resource consumption, such as dosing systems for cleaning agents, LED lighting, motion detectors, and timers. Our heating comes from the local district heating network, and our electricity is generated from hydropower. We reduce water usage and avoid plastic by using glass bottles. Strict waste and recycling management ensures efficient reuse and minimal waste.

**Culture and Tradition** Our region is rich in culture and traditions, which we preserve and share with our guests. We actively integrate local culture into everyday hotel life and support local clubs and cultural projects. We promote regional specialties prepared according to traditional recipes—some of them homemade with love and care.

**Nature** Protecting nature is central to us. We use natural materials in construction and operations. Our flower and vegetable garden provides fresh ingredients used in the kitchen and decoration. Natural animal husbandry helps preserve biodiversity and enhances product quality.

**Mobility** We promote sustainable mobility by encouraging guests to arrive by public transport. Charging stations for electric vehicles are available. Many hikes start directly from the hotel or are accessible via public transport. We optimize purchasing to reduce transport needs, and many employees walk to work.

**Conclusion** Through these measures, we actively contribute to a sustainable future and offer our guests a relaxing environment with a clear conscience. Our commitment to sustainability is an ongoing process that we continuously improve and develop.
